

82nd Ave in East Portland has been neglected for quite some time. I drive on other ODOT roads throughout Portland and don't see the same neglect, year after year after year. Every once in a while they will patch some holes here and there yet this road needs extensive repair. People weave in and out of the lane to avoid deep pot holes sometime endangering oncoming traffic that is joining the center lane to turn. This is a marginalized side of the city and it feels like ODOT is just avoiding doing any repairs in favor of other areas.
