

To: Senate Committee on Judiciary
and Ballot Measure 110 Implementation

3-20-21

Senate Committee Members I would like to thank you for holding hearings and work shops on our behalf concerning Measure 11

I would like to explain what getting some good time would mean to myself and my family.

I am a first time offender who had not been in trouble at all in my life. I was given an 135 month sentence by an Assistant D.A. who was unwilling to give any programs or outlets for good time. This law as it is, is a 1 strike law. I don't feel my court appointed Attorney did very much for me, but they don't get paid very much so they do very little. The system needs to be changed.

I'm not saying I'm innocent, I made a bad mistake and have paid a lot of my life for it.

I have been a model prisoner since I've been in prison. I worked in the visiting room for the first 8 months until I could get into the Auto Shop.

100

The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is well-posed and that the solution exists and is unique. The second part of the paper is devoted to the construction of the solution. It is shown that the solution can be constructed by the method of characteristics. The third part of the paper is devoted to the numerical solution of the problem. It is shown that the numerical solution can be constructed by the method of finite differences. The fourth part of the paper is devoted to the stability analysis of the numerical solution. It is shown that the numerical solution is stable. The fifth part of the paper is devoted to the conclusion. It is shown that the numerical solution is accurate and stable.

I've been in the Auto Shop for the past 6 years. I'm the lead mechanic and the clerk in the shop. I've become a much better mechanic and have picked up Word and Excel to help me be a better clerical person.

Since I've been here, I have not been in any trouble, celled in, had a daily fail or anything of the kind. I've worked very hard to stay out of trouble and I'm proud of that. It is very easy to break a rule and not even know it. It is all about your attitude and how you treat others.

Most of my family is very supportive of me, and some are not. I am a changed person since I've been down. I would like to get out, get a good job, start my life over, help my family and prove that I'm worth a second chance a little earlier than planned.

I believe giving good time Retro-actively would give a lot of AIC's a reason to be a better person. Most guys don't feel they have any reason to behave.

The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is well-posed and that the solution exists and is unique. The second part of the paper is devoted to the construction of the solution. It is shown that the solution can be constructed by the method of characteristics. The third part of the paper is devoted to the numerical solution of the problem. It is shown that the numerical solution can be constructed by the method of finite differences. The fourth part of the paper is devoted to the stability analysis of the numerical solution. It is shown that the numerical solution is stable. The fifth part of the paper is devoted to the conclusion. It is shown that the numerical solution is accurate and stable.

Since there has been some hope on reforming Measure 11 guys have be behaving better in here, even during the Covid lockdown. They feel there is a reason to believe and stay out of trouble.

Most of us in here just pray for a second chance to prove ourselves on the outside.

If we were to get retroactive good time there are some guys who would get out right away, but most of us would still have time to do. I would still have 1-2 years left depending on % of good time.

We are asking for good time for good behavior, I believe if someone takes the time to better themselves then they have earned the chance at some good time.

Thank you for listening and please support SB 191.

Sincerely
Brian Russell
