

I support SB 852, which would disallow the mortgage interest deduction for high income earners and which allows the deduction only for the taxpayer's principal residence. I have benefitted from this deduction for many years, but I have also needed it: I have supported my family on an annual income under \$100,000. Now, most people like me can no longer afford a house in Portland at all. It's time to use this money to benefit low-income Oregonians and promote housing for all of us.
