

About ten years ago, I became very sick and not a single doctor in the traditional medicine field were close to identify my environmental illness that was slowly stealing my life during the height of raising my three daughters. My life was literally saved when I became under care of my first naturopathic medicine doctor - ND. They were able to figure out what was going on and treat me. I can confidentially say I am back to my old self but better and I give credit to my great NDs. Because I chose ones who were covered under my insurance, this made all this possible. Please allow NDs to be covered under the health care plans available to us. Thank you very much.
