

Dear Committee On Energy and Environment,

I support SB 583. I'm in favor of a moratorium on the very largest of large dairies until the impacts of industrial dairies, including impacts to air quality, climate, water quality, water supplies, small and medium-sized dairies, community and worker health and animal welfare, have been adequately studied and addressed through laws and rules. These large scale industrial operation place very high demand on our natural resources and the climate. These things should be studied before moving ahead with more mega dairies.

Respectively,
Peter Murray
