

I am in favor of putting a moratorium on mega dairies - but we need to add mega poultry farms. These are huge industrial operations that have millions of chickens, and they are very, very toxic to the environment. They release toxic fumes of ammonia into the surrounding towns. Foster Farms wants to build in Brownsville - and not only is this bad for the environment (the land, the air, and the water), but it is a threat to family farms in that area. We want to have more family farms in Oregon, not less. If Foster Farms comes, this could open the door to more factory farms. Please do not let any more industrial animal agriculture into Oregon. Also, chickens live a HORRIBLE life in the CAFO's.

Susan
