

I support House Bill 2538 because I AM SO VERY TIRED OF FEELING like I am in the middle of a race track. Whether I am at home, on a walk, or riding my bike, there is constant bombardment with the excessive noise of these souped up engines. We must have some noise level control if we are to have peace again. Some of these cars are so loud that as they drive by me it sounds like a 247 taking off. Please help us and do something about this noise. Thank you!
