

To Whom it May Concern

Allowing a person the opportunity to EARN GOOD TIME would improve a persons thought process and decision making both while incarcerated and once the person is released. The goal is to rehabilitate and reduce the chances of returning to prison due to poor decision making. If we can be more aware of the pro's and con's or rights and wrongs of every decision we make I believe we can correct the behavior of an AIC before we return to society. Building a solid foundation on a persons thought process and decision making is critical to reducing the chances of coming back to prison.

Returning to our families and society with this new thought process benefits everyone, please allow us the opportunity to rehabilitate and improve ourselves by allowing us to EARN GOOD TIME with good behavior and decision making.

THANK YOU SO MUCH

JACOB WATKINS
