

Please oppose bill SB 832. The animal rights groups are using the covid situation as a reason to push unnecessary and unfair bills through. They have never been concerned for human health and they are still not today. They want the complete ban on all farming and animal use(even pet ownership). Mink farms are on their radar now, but they are against ALL animal use. Mink farms are humane, sustainable, and legal. They feed human food waste stream, products that would otherwise go to landfill. Mink garmets are biodegradable and sustainable, unlike other petroleum based winter garments. Mink farms that have contracted covid are no risk to human health. The virus moves thru in a matter of days and the farms in WI can no longer find the virus. Please vote against SB 832.
