

Hello, I am Marsha Barr a 70 year old resident of Planet Earth, and I am in support of HB2488.

I am deeply concerned for the health of the planet that sustains us and future generations. There is no time to waste in actively addressing Climate Change. As we engage in sequestering carbon, we need to do it with an eye toward equity. The "sacrifice zones" that are the result of not coming to terms with the fact that our systems are built on long-standing injustice ... need not be the way of the future.

I urge you to support HB2488. It is fair. It gives direction and power to local communities to work for a sustainable future. It has some starter money as recommended in the governor's budget.

Don't dally...just support this bill!

Thank you, Marsha Barr
