

I fully support the ban on coyote contest killing. I find it's current practice highly unethical and unnecessary. The fact that these contest hunters use electronic devices that mimic the sounds of a baby coyote in distress is disgusting. I think by allowing contest killings, the state of Oregon is allowing for the mistreatment and abuse of wildlife. Contest killings are also disrespectful to wildlife. It has no place in our current society. My understanding is that all 5 of Oregon's congressional districts are opposed to contest killings. It's time we pass HB2728 before another contest results in the wrongful killing of hundreds of coyotes.
