

Good morning -- I write in support of this legislation as a patient of Naturopathic Doctors, to whose good offices I owe -- almost entirely -- the good health I possess, at age 76. Without their care for me -- and by care, I mean not just their knowledge of nutrition, whole body systems, symptom diagnosis and treatment -- but personal, spiritual, heartfelt care for me -- if I were left in the cold insurance driven offices of my MDs -- I would experience the chronic illness that so many suffer.

Please pass this bill.

Regards, Carol Ferris
