To whom it May Concern,

As a homeowner for the last 11 years it has been a huge joy. Not having worry about my lease ending or renewing, do I stay, do I go. It has been nice to raise my kids in a home that we own. I am responsible for not anyone else.

We didn't buy a house for the financial benefit because frankly it's the same to own a home as it is to rent a decent apartment. We bought a home for comfort, for safety, for growing our family and beyond.

The tax benefit is nice especially since we down to one child at home and we both make a decent wage. It's coming to a point where owning a home isn't worth it. Do not take this away from us. We don't get many tax breaks. We are an average family who is just working towards retirement. If you continue to take away our tax breaks we will be doing nothing but paying taxes.

We have voted our representatives to support us and support our needs. Its time for you to do what you said you would do and support the taxpayers who pay your salaries.
