(1-2)

Dear Committed; my name is Jack Nutting and
I'm writing to say that making this Bill a retroactive
thing will help me greatly to get back to my longing family.

All the sooner I can get to my doctor, and dentist
back home to get neglected care taken care of.

All the sooner I can start to rebuild my life and teach
the younger generation back home what I now know.

It only makes sense to cut these sentences
short and re allocate those funds into actual rehabilitation.

Psycho therapy - Education - Job training - Health care •

We have all read the stats on prison reform •

If there is an issue with the Sex offenders please think
about amending some thing in there about chemical
castration probation • Thank you for your time •

Prisons like the one I'm in are simply storage facilities where 8 out of ten of the security guards disrespect, hate, and dehumanize inmates for fun and the medical and dental staff do as little as possible.

It is overcrowded as far as being able to help men change and the whole construct pushes people in a circle of recidivism. If men get in trouble while in healthy programs that are helping them and others they are punished by kicking them out of those programs.

The whole mentality of security has nothing to do with rehabilitation.

I can't express how much this bill may be able to help Oregon's prison reform never mind myself.

Joe Tuttle
