

Hello, my name is Jeremia.R and as of right now I'm serving a mandatory day for day sentence under measure 11

I know I'm just an Inmate, and I know the community doesn't want us back out there. I just want to be heard, even though I'm an Inmate.

I'm writting this letter in favor an insupport of SB191 and keeping it retroactive. Measure 11 is a very harsh sentence. Me, others, and including our families don't agree with measure 11, Everyone deserves a second chance to be a positive and productive member in the community

Our family's disagree's with setting us up for failure, and not having the right programs to help us, Incentives, and reason's to change the way we think or live

Oregon has the biggest over crowding problem, Alot of the issue's is due to this mandatory sentencing

It's a major clog in the oregon prison an jail systems. For you guys to pass a good time bill without it being retroactive won't help the over crowding in the prison systems. I see these issue's on the new's all the time, but nothing has been done about this situation to fix this issue's now this is the oppertunity to help fix this problem that oregon has

Passing this, sb191 bill with retro-active will give us the oppertunity to work hard, think before acting out and have something to work towards, something rewarding, to stay out of trouble and do what's right to help our self's, This will give us the oppertunity to change our thought process, But without

Retroactive in the SB 191 bill wouldn't give us anything to look forward to, an not wanting to care.

We all deserve a second chance in life, and to be a better person in the community.

When we are sentenced to Measure 11, day for day, It not only effects us, but it truey effects our families. I understand that Im responsable for my own actions an yes justice should be served, which I do agree about that, And our families are being punished along with us.

Passing this SB 191 ^{with} retroactive bill will not only give us motivation or an incentive. It will also give our families hope an encourage us an to push us more, And also to do good, so I dont miss out on my children's life

I'm praying that this SB 191 bill with retroactive passes because it will allow me and others the opportunity to be home sooner to be able to build a better relationship with my children and my family, to be there for them. That would be the biggest reward for me, something to look forward to in life.

Please take this in consideration not only for me but for our families and give us the opportunity to have a second chance in life and out in the community.

Thank you for taking your time out of the day to read this

Sincerely:
Jeremica Roben
