

I can't believe that this bill can even be considered. I have been a mink farmer all my life and to think that our livelihood could be stripped away is unthinkable. North American mink farms have had a certification program that we imposed on ourselves to make sure our animals are raised humanly. To use the excuse of spreading COVID-19 as a reason to close us down is unbelievable. We have a vaccine coming soon, so we do care. I strongly urge you to oppose this bill. Thanks for the opportunity to voice my comments.
