

I strongly oppose this bill.

This bill basically creates a state-level student council of non-white students to help direct educational policy. Excludes membership of the 85% majority of students in Oregon based solely on their Euro-American ethnicity. Where is the representation for "white" economically disadvantaged?

We need to come up with something that represents ALL the students and not just 15% of them. This bill will cause Racial inequality.

Please do not make our schools more racist.
