

Please support HB 2728 and permanently ban the blood sport of killing coyotes for the sake of killing and prizes. Coyotes are an essential component of a diverse wildlife community. Follow the science - killing adult coyotes for blood sport and leaving younger coyotes only creates migration of other coyotes and rodents - since these will not be necessarily managed by younger coyotes and mature coyotes will move in to fill the void left by so many coyotes having been killed. This bill does NOT ban hunting. Coyote killing for prizes violates ethical hunting and endangers hunting. Please support this bill and ban coyote killing for pleasure and prizes.
