

Their practices are harmful to animals, especially our environment -air.water. ground and they are redefining farming. Farming should be in sink with the ecosystem it exists in. Thus us not a part of this practice.

In addition the product they produce has poison in it from the round up that is sprayed on the grain these chickens are fed . The hormones used are bad as well

They take advantage of the contract they sign with the farmer by bullying him in general and into their practices which if not legal of course the farmer will be blamed. They are known to take advantage of poor farmers.

They are nothing but bad news and once they get in they are virtually impossible to get rid of. There is nothing that is right about this.

How did they get their permit in the first place was notice served?

THIS IS WRONG
