

I believe that every person committed to Oregon DOC should earn good time and have all activities available to them. Oregon DOC could do 1000 times more than they are doing for the CORRECTIONS part of being incarcerated. People will less likely reoffend if they have goals to attain while locked up. Being a good and honest person makes for a better life anywhere you are and in prison as well. I support this bill because there are good people locked up who made a mistake, that didn't even have a record and are spending 25 years, day for day. The GOOD in good time is there for a reason.
