

I do not agree with this bill. If you don't like mink don't buy it. If I don't smoke I don't buy tobacco but everyone has the right to make a living. Mink are a renewable resource that are 100 percent recycled, from clothing, fuels, cosmetics, and proteins. Mink farms are also a huge consumer of other food waste that this country produces, and because of that we save a lot of materials entering our land fills! Save the planet by using natural resources and using natural products!! God bless America
