

This bill is unconstitutional! Farmers have a right to raise mink and or any other livestock! We understand the public concerns, we are also concerned about our livestock and take every precaution to keep our animals from leaving our farms. We can assure the public that we will continue to keep our livestock on our farms and every means available to keep our employees, ourselves and the public safe! I don't understand why anyone would listen to animal terrorist originations who are only trying to put fear into the public! They have destroyed research facilities and by passing this bill you are condoning their behavior!
