

I can't believe this bill is even being discussed! As a woman I am disgusted that animal terrorist organizations have been able to persuade you to listen to what is only a fear tactic, to get you to try to shut down any farmer! Farmers have been a crucial part of this country since the beginning and to not support them is absolutely appalling! I should be able to wear or eat anything of my choosing! If someone doesn't want to wear fur they don't have to! But my rights shouldn't be taken away just because someone else feels differently! As long as the animals are taken care of humanly, which I believe these farmer are, there is no reason to take away their livelihood or my right to wear fur just because some terrorist organizations is taking advantage of the corona virus to put nothing but fear into peoples minds!
