

I OPPOSE SB832! This bill is using COVID as a reason to stop mink farming, which serves the far-left legislators very well. First they will kill off the mink farmers, then in a few years, they will find another excuse to destroy other animal farmers. Maybe there will be a useful outbreak to use. Swine flu perhaps. I stand in total opposition to this bill which is a foot in the door to getting rid of animal agriculture. Not tomorrow, but in short years to come. I am a farmer, and I clearly see how Democrats in Oregon demonize my way of life, and the lifeblood of fellow farmers.
