

I oppose committee members using deception to hide agenda from the voting public. This bill arrived intended to be a "commission to study laws" and has turned into a back door deal with lobbyist to change the landscape of the state in a harmful way. If you want to discuss 'cap and trade' then put it on the block, open the doors to the public, stop hiding it because you know it's a opposed on a higher percentage. If you truly believed in it you would put it on the ballot for voters to decide, but that's a moot point because you know it would fail miserably.

I oppose HB 2021 due to the lying and deception contained within it's purpose.
