

Chair Marsh, Members of the Committee -

I am writing in support of HB 2021 with the -5 and -9 amendments, and want to thank Committee members and workgroup members for their hard work developing this important legislation. As someone who experiences the growing problems with impacts from climate change myself, in my family and among friends and neighbors in my community, I feel this bill with the -5 amendment offers the best chance of moving Oregon forward in doing its share to reduce greenhouse gas emissions and put systems into effect to target the benefits especially to communities that have suffered adversely in the past.

Thank you.
