

Displacing homeless is nothing but cruelty. These are your citizens. They are people that have been made homeless by the capitalist system that we all suffer under. Many homeless are working. These are good industrious people. They need a space to secure their stuff so they can go to work, and have their stuff still there when they get back.

It is cruel enough to force them out of homes. To then send thugs to harass them during their sleep time it is beyond atrocious.

Please leave the homeless alone.

If you want to end homelessness provide homes.
