

The Portland Children's Museum has become such an institution in the city and state. It's one of the best children's museums in the country. Please find a way to allocate some funds from the state budget as well as the American Rescue plan to save this inclusive and important community space that benefits so many families each year. The Building Bridges community festival from fall 2019 was just one example of how the museum found ways to serve the broadest community of parents, children, and children's entertainers as well.
