

I would like to understand the rational thinking behind this bill. Scenario: I am a law abiding citizen who has been trained in gun safety, a background check on my record and legally registered as a CHL permit. If this bill passes, and now restrict my second amendment right to conceal carry, tell me how does that stop the person, who is not registered a hand gun, has not be trained, and does not have a CHL. Please tell me how that will accomplish a safer zone? All that will do is make those areas more vulnerable to attack for those intending on harm or carnage. How will this bill stop the shooter?  
Why not consider asking me before I enter one of areas to register at check that I have CHL?

Thank you,
