

This bill is a Gross attack on free Americans to defend themselves in the event that an imminent life threatening situation arises : who have taken the necessary steps to go through a vetting process to show that not only are they are law abiding citizens but also that they are of sound mind capable of critical thinking. The majority of of the Concealed Gun license holders take extra classes and training as well as divulge into video and literature on how to react appropriately to the various types of situations that can and will arise. More over; threats towards human life by CRIMINALS can happen anywhere at anytime with no law enforcement standing guard to react when seconds count. A legally armed and trained class of good citizens is priceless in value to the defense of fellow citizens. Once more; It is well documented that CRIMINALS don't obey gun laws or any laws that see fit to break; Law abiding citizens do. Please! Don't turn good citizens into potential felons for merely practicing their God given right to protect themselves and others as they see fit.
