

Support ODA Budget

The ODA has several issues on the table right now to work on.

1)Problems with China now not accepting our testing and rejecting shipments of seed up on arrival. This means the shipper pays freight both ways plus other export-import cost.

2)Help to promote cover crops to support the Oregon seed industry.

3)New regulations on importing seed have come down recently. Some of us hope that this might be dealt with in a more efficient way.

Again, please support the ODA budget.
