

Hello,

I am speaking in opposition to this bill. This is targeting law abiding citizens who have gone through extensive background checks and firearms training. It is intended to make felons out of everyday law abiding citizens who value the safety and freedom of our families. It is a direct attack on second and 5 amendment rights along with a quandary of other state laws. This will make it almost impossible to follow ever changing laws to entrap citizens in to become felons all to advance a freedom trampling agenda. It's based on politics not on safety. If it were based on safety then how would our great state ever allow legalizing hard drugs on a ballot in the first place. Take away our protected rights to self preservation and allow drug dealers and drug related crimes to overrun our communities. I am strongly apposed to this bill because all it does is say drugs and drug crimes are okay but law abiding citizens are not afforded the God given right to self protection.
