

I am speaking in opposition to this bill. This is targeting law abiding citizens who have gone through extensive background checks and firearms training. In which, criminals do not follow. It is intended to make felons out of everyday law abiding citizens, who value the safety and freedom of our families and communities. It is a direct attack on 2nd and 5th amendment rights, along with a variety of other state laws. This will make it almost impossible to follow ever changing laws to entrap citizens in to become felons. This is based on politics not on safety! If this was based on safety then how would our great state ever allow legalizing hard drugs to be on a ballot in the first place.

Take away our protected rights to self preservation, while allow drug dealers and drug related crimes to overrun our communities. This is not a accurate representation of your constituents that elected you. All of this nonsense will increase the criminal activity because criminals DO NOT follow the law!!!

I am strongly opposed to this bill because all it does is say that drugs and drug crimes are okay, but law abiding citizens are not allowed their God given right to self protection.
