

Lift the Cap.

I am running for the Portland Public School District Board Zone #4. Subbing for the public schools for 7 years I am eyewitness to how the schools were failing students.

The 1854 Congressional creation of the public school system is finally crashing, all caused by the teacher unions. 1954 Brown vs the Board of Education was a lawsuit AGAINST PUBLIC SCHOOLS not private schools. Public schools brought in institutional racism. In the last few years the public schools brought in child sex trafficking pedo grooming training that helps sex traffickers. Epstein got his girls from the public schools. The emotional traumatization environment of the public schools I was an eye witness. Parents do not know what goes on behind those closed doors that they had to under compulsion keep their kids.

I have documents showing how the public schools hide the sex abuse done to students. For 7 years and counting now my own state representative Tina Koteck, Speaker of the House, would not meet with her constituent about this travesty. Nigel Jacquiss of the Willamette Week was at first interested then abruptly didn't move forward. The owner of WW is our state's attorney general. I told the Editorial Board of the Oregonian who interviewed us three candidates what the Oregonian and the Public schools have in common is hiding the sex abuse of children, citing the Oregonian failing to publish the story after getting it out of her, Elizabeth Lynne Dunham, and how at age thirteen Governor Goldschmidt began in decades of abuse to her. Finally Nigel Jacquiss did her story. Only when she died at 49 did WW say her name. The Oregonian never has.

Parents must have the right to find the educational systems that will educate their children, instill love of learning in their children, keep them safe.

Since 1854 we pretty much have had a public school system that was more incarceration than education. The 1854 Congress designed it that way. About that time in American history the Democratic party was afraid of Free Black Americans and the Irish so they adopted the Prussian School system into America. Albert Einstein at age 16 renounced his German citizenship because of that school system.

Children have been traumatized. Who needs concentration camps when you have hospitals and doctors amputating the sex organs off of youth with the public school system cheering this on. School counselors telling parents to put their children on drugs. Claiming children are a problem when it was the teacher who had the problem and school boards allowing the misuse of children because the school boards would not stand up to the teacher unions.

Educational Choice.

Stop interfering with parents protecting their children. Funds follow the student now not the teacher unions. CHOICE.
