

Hi, I am a homeschooling mama. The charter schools allow me to teach at home with accountability to check in with teachers. I have tried doing homeschooling with out any help but failed to do schooling everyday because of daily life work. I Didn't have any guidance. Online charter schools really do help parents to be on top of there schooling. We are not creating solider's for the government, we are creating soldiers for God. Thank you. We all have a choice, we are free people, I do not understand why there has to be so much control in politics. Thank you for your time.
