

Online schooling through Frontier Charter Academy has been an absolute life line for our family. Our youngest daughter began FCA as a freshman. As a very active child, she has thrived in this environment as she is given the opportunity to pursue other interests during the day in between classes. The teachers at FCA are top-notch. The online experience for our family has benefited us directly in so many ways. We have all benefited greatly from the flexibility as all the classes are recorded and your child isn't tied to a classroom. Because of FCA online schooling as a family we've been able to weather a significant 2 year health crisis while maintaining our 85 acre hazelnut orchards and our small local towing businesses. Our daughter was able to take summer classes and is scheduled to graduate a year early this June. Online school was the very best educational choice for our daughter and we hope more families will have the opportunity by removing the percentage of student's limitation.
