

The Supportive Services that have been made available to me are a total game changer in my pursuit of my secondary educational goals, having had 3 major surgeries with in the past ten months. First and foremost the internet connection has allowed me attend my virtual math classes, stay connected with my math instructors and in contact with my Academic Advisors. Being a senior student, im 62, i didnt think distance learning was for me, growing up in classrooms and all. But my Community College's Administration and their Supportive Services Program have given me the tools to build a foundation for thr successful completion of my educational goals. Thank you
