

To whom it may concern:

I have a 10th grader and this is his first year enrolled in an online charter school. My son has always been a good student but he struggled with in person learning. He didn't feel challenged and he had a hard time in social settings. Since enrolling in an online charter school my son has thrived. His A's and B's are consistent, he is able to work ahead, and his attitude has improved tremendously. He seems a lot happier. This has been a silver lining during these unprecedented times.

Online charter schools offer a more personalized learning environment. They have been great about keeping parents involved, answering all our questions, and helping us navigate through their online systems. I honestly had never heard of online charter school prior to March of last year, but I'm so grateful to have found them.

Thank you for your time,  
Juanita Alvarado
