

I am writing in strong support of SB554. This isn't about infringing on people's rights it's about giving people rights. These are rights that provide safety in public places including schools, dorms and other places where there is no need for guns. We all know the statistics on accidental shootings, suicide and mass shootings. Why do legislators continue to care less and less about how the general public feels about gun safety and cave to the loud voices of a few. We all know this isn't threatening the 2nd amendment either. So, I ask you to make a very reasonable vote on supporting SB554 and do something simple that says you care about protecting the general public.
