

Dear Chair Patterson and Members of the Committee,

I, Sam Asher, am pleased to offer my support for HB 2574.

I am committed to support for the environment and have a personal desire to return to the earth upon my death. By using this method for final disposal of my body I am opting against wasteful space to be set aside (for a very long time) for my physical remains. Instead I would prefer that what remains of me is used to enhance the environment rather than contributing to the toxic effects of cremation or the wasteful space taken up by burial.

I ask for your support of this important legislation.

Sincerely,

Sam Asher
