

I, Kelly Ypil, am pleased to offer my support for HB 2574.

This is an opportunity to give back to Mother Earth rather than take as we humans are so quick to do. The freedom to choose a better way for all things considered. Furthermore, it feels graceful, respectful of the human vessel rather than cremation. What a privilege to be able to make a difference for future generations of forests, wildlife and our soil. It makes me feel proud to do the right thing and honor our environment going forward.

Our cemeteries are running out of room and taking up so much of our land, what does this look like for the fate of our planet and where will we go? Recompose is such a positive solution and I see only benefits - less waste, soil quality, cleaner air. Breath for a new world.

I ask for your support of this important legislation.
