to evacsupport

The CRFD is made up of a board of very dedicated volunteers. They have to fight for every dollar they spend on fire protection. To think our taxes would not increase if the CRFD were to get involved in such a huge project is not reasonable. If the oak creek area were to open a road or roads into and out of this area the traffic would significantly increase **resulting in road maintenance and yes more taxes** as well as vehicle accidents.

If it ain't broke don't try to fix it.
