

I would like to see land use laws change to allow what is allowed in Equine facilities to allow Dog sports. Allowing privately owned arenas to be allowed to practice their own dogs or give lessons in their own facilities within the laws. They should have this right being that with horses there is no complaints. It should be treated the same. By rights they should be able to train their dogs anywhere on their own property. Please change the land use laws to accommodate the dog trading world.
