

Healthy people = a productive society. Let us stand up as Oregonians to the insanity of our broken healthcare system and champion our right as human beings to all lead a healthy and happy life. What if getting the healthcare we need wasn't a big, expensive, and stressful decision? What if we could take care of health issues that get much worse simply because we can't afford to treat them early? What if we could get preventative care that will detect cancer early and save our life? What if we could get medications and lifesaving treatment that won't bankrupt us? What if we didn't have to work at a job we didn't want to just so we can make sure we have health insurance? Can you imagine a more equal system than what we have now? We all need to step up and demand change. This amendment states our priorities clearly. Let's take care of each other in Oregon!
