I am sick of the high cost of healthcare insurance. I am sick of the lack of available high-quality healthcare.
I am sick of paying lots of money for insurance that does not ensure my health, but ensures that a huge profit is made.
I am sick of healthcare insurance making my health care decisions by delaying and denying care.

YOU can change this--cure this sick system and ensure that all Oregonians have quality health care--not just insurance because insurance does not ensure quality healthcare.
Make Oregon a healthy example of what is possible.
