

Hello, my husband and I live out in the country. We don't have any problems with coyotes, because we know how we have to protect our animals.

Coyotes have a right to live like any other creature.

Many hunters even are against that senseless killing.

It makes no sense, because nature regulates the number of coyotes.

So please end the killing of coyotes as a sport. That is cruel and should not have a place on our culture.

Thank you! Elke Frank
