

I work in the service industry and in music production. It is next to impossible to receive adequate and affordable healthcare. I am currently on a Kaiser healthcare plan that has been afforded to me because of the current pandemic situation. It is by no means adequate or affordable. I pay a monthly fee plus a \$7,000 deductible. I will go into debt if something should arise. It is not sustainable and does not cover pre-existing conditions and is full of barriers to provide proper healthcare that is stacked with added costs and fees on top of a monthly payment.

My current employer (Morton's Steakhouse) offers healthcare for full-time employees (roughly 30+ hours a week excluding time off). It is mandated with management to keep employees under the minimum hourly requirement to keep enrollment next to unattainable. Being that i am partially employed on one side of my work life and on the other side considered as part-time work the current healthcare system is joke meant to line the pockets of the healthcare industry and to jeopardize my health and well being. It is not sustainable to my life or my fellow colleagues.
