

This bill must be passed. It would help every oregonian live their lives and pursue their dreams. Healthcare is a right for all people, and this bill will make oregon a leader in protecting our rights.

Here in Estacada, many of the jobs don't provide great health insurance, or any at all. This causes unnecessary hardship for everyone; people can't take some jobs, money continues to be siphoned away by insurance companies, and the health of the community is far worse than it could be. If this bill is passed, all of those problems could be resolved.

Please keep the average oregonian in mind when voting on this bill.
