

Dear Oregon Legislators,

I benefit SO MUCH from Reiki, Cranial sacral, life coaching and other alternative care providers. Please do not regulate them like Massage and Medicine. They all do absolutely beautiful work, all unique work. They can't and shouldn't be standardized. Please allow Oregonians to practice our FREEDOMS of choosing alternative practitioners without any registries and licenses. Not all of them can afford these expensive registries and be a part of the medical establishment. The reason they're not part of it is that their heart is in helping people outside the medical system. Please let go of this choke hold you're trying to mandate on our freedom of seeing an herbalist or a reiki practitioner. I should be able to have a wide choice and go see anyone or have my own practice outside the medical licenses. This entire industry is not trying to replace mainstream medicine! They're all complementary modalities to support individuals as they also do standard medicine.

Thank you for allowing our freedom of choice to remain free.

Lada Korol
