

Senate committee on education

I'm against any more programs being added to school teaching. Our kids are behind in the three R's. Our focus needs to be in time for those.

This bill is about removing more parental rights. Infringing in their care and plan for their child's dental needs.

There's wide difference of opinion on what good dental care is. Are you promoting a organic more naturopath way? Or a different mainstream way? How about Floride? There's documented evidence about it, pros and cons. I don't think the state has any business in this area. Your not a expert.

It also creates more state jobs. We are over burdened with state jobs and PERS.

This is a obvious NO.

Thank you

Liz Turner
